

# Cellular Weight Scale

## Accurate, Real-Time Body Weight Monitoring.

It Just Works. No Matter where your users are, you'll get the data.

The scale is made from the highest quality materials available and with a large digital display, the scale is easy to read. The scale has a proven track record of accuracy and reliability as it has been utilized by leading health insurance providers and has been a fundamental component of weight management programs and medical research studies. Thanks to cellular technology, the scale works right out of the box eliminating the need for any setup or configuration procedures.
